More Information .....	5

2BM Software are very happy to announce Mobile Work Order release 2303, the latest release of our market leading mobile maintenance and service solution. The focus of this release is to introduce data export into our checklist solution. Additionally it includes a number of corrections to existing functionality.

## New Features in Mobile Checklist Module

### Response Data Export

It is now possible to export response data from checklists either directly into excel or to an ALV grid in SAP where the user can choose to save the data as they see fit.

### Issues Corrected

The following issues identified in previous versions of the product have been fixed in this release.
